

**It's a day time... lot of sunlight coming from windows. We don't need lights.**

**But we need fans because its hot in day time.**

**Once its evening time and dark in home.... we need to switch on the lights.**

**There are many members in my family. Anyone can switch on and switch off lights and fans. I will be happy and will prevent hitting the switch board. I will have my hands to myself. I will fold my hands.**

**After my mom switches on the light, the dining room is lit well.**
